***EXAMINER'S AMENDMENT***

An examiner's amendment to the record appears below. Should the changes be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's attorney Carl Sanders on Dec 4th, 2009.

Additionally, the double patenting rejections described in the previous office action have been withdrawn upon further consideration as described below.

Claim 12 of the instant invention was rejected under claims 12 and 26 of copending application 10/657079. However, claim 12 of copending application '079 has been amended to recite considerable patentable distinctions, and thus the double patenting rejection no longer applies. Also, claim 12 of the instant invention does not require the pulley's, belts, or bellows of claim 26 of the '079 application, and thus, after further consideration, the DP rejection on this basis is withdrawn.

Claim 18 of the instant invention was rejected under claims 12 and 26 of copending application 10/657079. However, claim 12 of copending application '079 has been amended to recite considerable patentable distinctions, and thus the double patenting rejection no longer applies. Also, claim 18 of the instant invention does not require the pulley's, belts, or bellows of claim 26 of the '079 application, nor does claim 26 of the '079 application require the semi-conical expander of claim 18 of the '145 application, and thus, after further consideration, the DP rejection on this basis is withdrawn.

Art Unit: 3715

Claim 17 of the instant invention was rejected under Claim 30 of copending application 10/657,079. However, claim 17 does not have the details pertaining to the bellows described in claim 30 of the '079 application, and thus the DP rejection of this basis is withdrawn.

Claim 14 of the instant application was rejected under claim 2 of copending application 11/202,646. However, after further consideration, claim 14 is distinct from claim 2 of '646, at least because claim 2 of the '646 application does not require the spring described in claim 14 of the '145 application, and also claim 14 of the '145 application does not require the carriage assembly of claim 2 of the '646 application. Thus, the DP rejection on this basis is withdrawn.

Claim 34 of instant invention was rejected under claim 4 of copending 11/202,646. However, after further consideration, claim 34 is distinct from claim 4 of the '646 application, because claim 4 does not require the plurality of jaws required by claim 34. Thus, the DP rejection on this basis is withdrawn.

***The amendments to the claims are as follows:***

In claim 12, line 1, replace "an apparatus, comprising:", with -- an appartaus for interfacing a peripheral device for simulating a medical procedure, comprising: --

In claim 12, beginning on line 2, replace "therefrom," with --therefrom, the peripheral device configured as a medical instrument and --

In claim 18, line 1, replace "an apparatus comprising:", with -- an appartaus for interfacing a peripheral device for simulating a medical procedure, comprising: --

In claim 18, beginning on line 2, replace "device," with -- device configured as a medical instrument, --

Art Unit: 3715

In claim 34, beginning on line "actuator at a second end and initially in contact with the grasping member," with -- actuator, positioned at a second end of the grasping member and initially in contact with the grasping member, out of contact with the grasping member, --
